Music for a Loonie
for Guitar Ensemble and String Orchestra
INSTRUMENTATION

This piece was written for intermediate-level players. There are places in parts that are certainly at a more beginning level (such as in most of the double bass part) and some places that might push the boundaries of intermediate players, particularly in the higher register of the violins. In those places in the violins, I've written those notes as divisi, giving the players/director the option to have the (or some) players play the lower octave notes. (See the explanation below.)

Balance between the guitar ensemble and string ensemble was a very real concern when writing this piece. The guitar is far less capable of projecting sound string instruments. A forte from a classical guitar will be quite different from a violin. Therefore, it is assumed that the number of guitasts in each section of the guitar ensemble will exceed the number of players in the string sections. To what degree depends on the variables such as hall size, acoustics of the hall, quality of instruments and the ability of guitarist to project. If that is not a possibility, sound reinforcement of the guitars will be necessary.

**INSTRUCTIONS**

**Percussive effect**

**Guitar and Double Bass** (i.e. Letter A, m. 12)
Slap the shoulder or side to get a bright and sharp percussive sound. (Guitar: slap side of guitar, just below the neck at 12th fret.)

**Violas** (Letter B, mm. 31-38) Slap lap with left hand to get a bright and sharp percussive sound.

**Letter F**

Guitar 1 (mm. 79-81): With the joints of the index and middle fingers, knock against the top of the guitar to get a sharp and percussive sound. Right Hand: Rest palm on strings. With amí fingers together, tap on top of guitar, just below 15th fret.
Left Hand: Grace notes (a-m-i) should be played with rhythmic clarity and measured accuracy – more like pickup notes.
Slashed notes: as with right hand, tap with amí fingers together.

*Resqueda* Note: On beat 1, roll the chord as a triplet grace note gesture, which will precede the beat. On beats 2-4, strum down simultaneously with all four fingers.

a.) Starting on the 5th string, and playing over the portion of the fingerboard that extends on top of the guitar (frets 11-17), quickly flare or fan the fingers downward, beginning with the ring finger (or even the pinkie) and ending with the index. It is not important the you strum every string or if you hit the 6th string.
b.) Immediately afterwards, quickly strum up with the thumb, aiming primarily for the first two or three strings. Again, don't worry too much about strumming all strings – it's the gesture and rhythm that counts here. (Optional: As the thumb comes up, let it strike the edge of the fretboard for an extra percussive effect.
c.) With all four fingers (index, middle, ring and pinkie) tap sharply on the fingerboard (between frets 11-17), or even partially on the top of the guitar, just below this area of the fretboard.
d.) Lastly, with all four fingers resting on the strings after the tap, strum up on the strings by simultaneously drawing and curling all four fingers towards the palm of the hand.

**Sul Ponticello** (Letter G, Guitar 1) Play as close to the bridge as possible.

**String Divisi** (Violin II: mm. 57-59 and 67-69; Violin I: mm. 62-66 and 67-69)

*The higher octave is preferred in all cases. However, for intonation reasons, it may be necessary for some to take the lower octave.
